IDEATION PHASE

Brainstorm & Idea Prioritization

Date	11 October 2026
Team ID	SWTID-2026-7837
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template

Brainstorming provides a free and open environment that encourages team participation in creative thinking and problem solving. Ideas are generated, grouped, and then prioritized according to importance and feasibility.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement: IT procurement users need a consistent and automated process that moves approved Standard Laptop requests to the Hardware team without manual task creation and assignment.

Focus Area	Team Discussion / Observation
Approval-to-task transition	After a Standard Laptop request is approved, the next procurement activity should begin automatically.
Task creation	Manual creation of a Catalog Task can cause unnecessary effort and delay.
Task assignment	The generated task should be assigned to the Hardware team automatically.
Task visibility	The Hardware team should receive a clear, actionable Catalog Task after approval.
Process consistency	Automation should reduce manual errors and ensure approved requests are processed consistently.

Step-2: Brainstorm, Idea Listing and Grouping

Idea Group	Brainstormed Ideas
Workflow Automation	Use Flow Designer to automate the process after Standard Laptop approval.
Automatic Task Creation	Create a Catalog Task automatically when the Standard Laptop request is approved.
Automatic Assignment	Assign the created Catalog Task to the Hardware team automatically.
Service Catalog Integration	Use the approved Service Catalog / Requested Item as the starting point for the automated flow.
Approval Integration	Trigger the next workflow action based on the approval outcome.
Task Visibility	Create an actionable Catalog Task so the Hardware team can begin laptop configuration promptly.
Process Consistency	Use a defined automated flow to reduce manual errors and delays.

Step-3: Idea Prioritization

The ideas are prioritized using the template's Importance and Feasibility approach. Higher-priority ideas directly support the stated objective and can be implemented using the described ServiceNow capabilities.

Prioritized Idea	Importance	Feasibility
Automatic Catalog Task creation after approval	High	High
Automatic assignment to Hardware team	High	High
Flow Designer approval-to-task automation	High	High
Integration of Service Catalog / Requested Item with the flow	High	High
Improved task visibility through Catalog Task creation	Medium	High

Prioritized Idea	Importance	Feasibility
Additional workflow enhancements	Medium	Medium

Selected Concept

Implement a ServiceNow Flow Designer automation that connects the Service Catalog, Requested Item, approval process, and Catalog Task. When a Standard Laptop request is approved, the flow automatically creates a Catalog Task and assigns it to the Hardware team for configuration.

Expected Value

• Eliminates manual Catalog Task creation after approval.

• Automates task assignment to the Hardware team.

• Improves task visibility and processing continuity.

• Reduces delays and minimizes manual errors.

• Provides a simple, consistent end-to-end procurement workflow.
